## Professional Experience

### IT Help Desk Analyst (Intern)

Iganmu, Lagos

The FMN Group

Apr 2024 - Oct 2024

- Resolved support tickets across Windows, Office 365, and basic networking, maintaining a high first-contact resolution rate.
- Created a troubleshooting knowledge base and step-by-step guides that reduced average ticket resolution time.
- Assisted in software system rollouts, coordinating user training for staff and achieving adoption targets on schedule.
- Performed routine hardware maintenance and imaged workstations, improving uptime and reducing repeated issues.
- Automated repetitive helpdesk tasks with simple scripts, saving hours for the support team.

## Projects

### AppBank - Personal Finance Tracker

2024 - Present

[View Code on GitHub](#)

- Built a comprehensive budget tracking application using **Python (Flask)** and **SQLAlchemy**, featuring secure user authentication and database management.
- Designed a responsive, Apple-inspired "glassmorphism" UI using custom **CSS** and **JavaScript** for a modern user experience.
- Implemented an interactive analytics dashboard using **Chart.js** to visualize real-time spending trends and category breakdowns.
- Developed features for budget planning, expense logging, and automated recurring alerts using **Flask-WTF**.

## Education

### B.Sc. Computer Science

Lagos, Nigeria

Caleb University

2021 - 2025
